

## PREDICTABLE ESTHETIC IMPLANT TREATMENT

In Association with Toledo Periodontics - Dr. Ziad Tohme

April 18, 2012

### Program description

This program will provide an overview of the appropriate indications and prosthetic applications for dental implant treatment. A range of restorative options will be presented, from fully edentulous cases to single- or multiple-tooth implant cases. Topics that will be discussed include treatment planning for esthetic success and the restoration process with corresponding prosthetic component options.

Participants will learn how to place abutments and recognize the different techniques and components required for implant-level and abutment-level impressions. The program will demonstrate the advantages of tissue-level and bone-level restorative platforms for clinicians transitioning into implant dentistry. Participants of this program will understand how to assimilate restorations supported by dental implants into their practice with predictability and confidence.

### Learning objectives

- Identify restorative components as related to implant dentistry
- Understand the treatment planning process for single-tooth and multiple-tooth restorations
- Understand features and benefits of the LOCATOR® Implant Attachment System for implant-supported dentures
- Place a solid or cementable abutment, and replicate impression procedures
- Select the appropriate abutment for esthetic restorations

CE Credits to be provided by:

### Speaker

**Dr. Bryan T. Harris** originally started in dentistry through his training as a fixed crown and bridge technician for five years. He attended the University of Louisville School of Dentistry (ULSD), and graduated in 2004. As a Prosthodontic resident at the University of Texas Health Science Center at San Antonio (UTHSCSA), Dr. Harris focused his training in implant dentistry. While in residency, he completed his certification as a lab technician. He is currently a full-time prosthodontic faculty member at the ULSD, and maintains a practice limited to implant, fixed and removable prosthodontics. He teaches in the graduate programs and in the Oral Health and Rehabilitation Clinic where he emphasizes to the students the importance of restorative guided implant therapy. He is a lecturer for the Implant Preceptorship that is held annually at UTHSCSA.
